“HybridTech® Armor” is a Registered Trademark of CPS Technologies

Norton, Massachusetts. October 22, 2009. CPS Technologies Corporation (CPS) (OTC Bulletin Board: CPSH) today announced it has registered **HybridTech® Armor** with the US Patent and Trademark Office.

HybridTech armor modules are comprised of multiple materials completely enveloped within and mechanically and chemically bonded to lightweight and stiff aluminum metal matrix composites. CPS believes that HybridTech armor modules offer a lightweight, multi-hit capable, and cost competitive, alternative to conventional steel, aluminum and ceramic-based armor systems.

ABOUT CPS

CPS serves a portfolio of end markets with advanced material solutions, the most significant

solution being metal matrix composites (MMCs). CPS has a proprietary, leading position in MMCs for thermal management of electronic components to increase performance and reliability. CPS products are used in internet routers and switches, motor controllers for hybrid vehicles, electric trains and subway cars, cellular telephone base stations and electricity-generating wind turbines, among other applications. CPS also provides components for packaging and structural applications using precision cast aluminum and metal matrix composites.

CPS Delivered a Number of Individual HybridTech® Armor Tiles and Large Modules to the Army Research Lab for Testing, Under Cooperative Agreement W911NF-08-2-0017 – “Hybrid Metal Matrix Composite Encapsulated Ceramic Armor Technology Development”
